

PRODUCT DESCRIPTION

STENI Terra

AREA OF USE

STENI Terra is a robust panel designed to be used as exterior ventilated cladding for foundation walls. This foundation panelling is suitable for all types of structures. STENI Terra is particularly well-suited for areas where there is a lot of moisture.

ORIGIN

STENI Terra is manufactured by STENI AS in Vestfold, Norway. STENI AS has developed and manufactured unique façade panels since 1965.

COMPOSITION

STENI Terra is a fibre-glass reinforced cured polymer composite panel with a core of crushed natural stone.

SURFACES

STENI Terra has a rough and natural surface (front) of crushed stone, with up to a 25-year functional warranty. Choose from several sand colours with grades from 1–2 mm. STENI Terra is a white panel dyed throughout. The edges and back of the panel are untreated.

FORMAT

STENI Terra is available in a thickness of 5 mm. Production width is 1,195 mm. Standard widths are 595 and 1,195 mm. Panels are delivered with a length of 2,395 mm.

UNIQUE PROPERTIES

STENI Terra is a highly resistant material that maintains its technical properties under extreme climatic conditions. These panels have excellent resistance against a variety of chemicals. Unique properties include:

- ✓ Natural surface
- ✓ Exceptional scratch resistance
- ✓ High durability with up to a 25-year functional warranty
- ✓ Elastic and bendable
- ✓ Robust with high impact resistance
- ✓ Water impermeable and stable in humid and cold climates
- ✓ Easily washable surface that can withstand high-pressure washers up to 100 bar

ENVIRONMENT

At STENI AS, we manufacture our products in Norway, using green energy from hydropower plants.

STENI AS reserves the right to change product composition and specifications without prior notice. STENI AS accepts no liability for printing errors.
